

AKSHAYA V

Full Stack Developer (Fresher) | Web Development

+91 8870744591 | akshayavs2013@gmail.com | GitHub: Ak-somanathan | Puducherry

PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience in full-stack web development, combining Python and Node.js backend work with MySQL database integration, and foundational front-end skills in HTML, CSS, and JavaScript. Built and contributed to database-backed applications end-to-end, from user flow design through backend logic and testing. Strong in problem-solving, debugging, and Git-based version control, with a fast learning curve currently extending into React.js and Node.js for full-stack frameworks.

TECHNICAL SKILLS

Front-End: HTML, CSS, JavaScript

Back-End: Python, Django

Database: MySQL, SQL Queries, Database Design

Tools & Practices: Figma, Git, GitHub, SDLC, Data Structures, File Handling, Debugging & Testing

Currently Learning: Flask/FastAPI, AWS cloud deployment

PROJECTS

Detection & Mitigation of Attacks on Medical IoT Devices

2025 – 2026

- Built a real-time full-stack security system that detects network attacks on medical IoT devices and automatically blocks threats, integrating backend logic with a MySQL database.
- Developed and tested rule-based detection logic in Python, debugging edge cases to improve detection accuracy and system reliability.
- Designed the database schema and queries supporting real-time data checks and threat logging.

Regional Event Navigator App

2024 - 2025

- Contributed to a full-stack mobile app for discovering regional events, designing user flow and collaborating with the team on front-end usability.
- Worked with Node.js and SQL to plan backend features and database structure for storing and retrieving event data.

INTERNSHIPS

Python Developer Intern | CodSoft

3 Months

- Applied Python programming to real-world tasks, writing and debugging scripts and strengthening core logic-building for backend development.

Web Development Intern | Nexgen Technologies

1 Month

- Built and tested components of web applications, gaining hands-on experience in backend development and structured system design.

EDUCATION

Bachelor of Technology in Information Technology

2022 - 2026

CGPA: 8.84

Higher Secondary Certificate

2021 - 2022

Percentage: 83%

CERTIFICATIONS

- Diploma in Python
- CASTILO'25 Hackathon — RU
